Hello, due to circumstances I was not able to finish N&O #115 column in March.
A bit late but here we are.....

Thanks to everyone who has contributed.

The Cuban babbler has been active throughout the month on its usual frequency 6529 kHz USB. All around 1400 UTC.

Westt11us also reports transmissions on 5637 USB at 1350 UTC. He says "Associated with a clicking noise in the background. The numbers are read much faster than the transmission on 6529 kHz. The 5637 transmission always seems to start before the 6529 one but they may run concurrently. Transmissions seem to last up to 30 minutes but seem to vary in length. I've only heard them counting upwards so far as high as 100 but it seems to vary. Has anyone heard actual messages being transmitted?"

Comments are greatly appreciated.

<<<<<<<<<-0-0-0-0-0-0-0-0-0-0->>>>>>>>>>

Strange network only sending 3FGs for 8 to 12 minutes, no messages heard. Probably always 2 frequencies in parallel. Skeds normally repeated daily. Keeps UTC skeds. More skeds expected, difficult to find (weak signals).

Skeds in March 2007: 14710//?? 0830 UTC: 555 (was 12200 27.3.)

::: MYSTERY "f" MORSE STATION

Jim logged this mystery station on two occasions. No idea who or what this is. It looks like the "%" is being used as separative just like PV0 uses "?". Could this station be related to PV0??? Any info is most welcome.

5425 kHz, 25-2, 2153 UTC: %2501%% (stops)

The same station has been reported by Fritz since 2004. He writes the "%" as "aa". The curious station appeared on at least 7 different frequencies between 2004 and 2007. See below.
